

***George Nota***  
Mechanical Manufacturing

After Cass I went to Wayne Univ. for one year. I joined the U.S. Army in Sept of 1961 and after boot camp at Fort Knox Ky. I went to Huntsville Al. There I got married and graduated from the Ordnance Guided Missile School at Redstone Arsenal. Then I became an instructor at the Arsenal at the Unit Training Command. I taught hydraulic and mechanical repair on the Sergeant Ballistic Missile System. I was discharged in Sept of 1964. I started working as a mechanical design trainee at Snyder Corp. in Detroit. After Snyder I worked at several job shops as a designer. Most of my career was spent at Fanuc Robotics in Rochester Hills. I became divorced in 1975 and stayed single until Thanida and I got married Dec. 2007. We live in Rochester Hills and we have a vacation house in Thailand. We are planning to open a school there to teach English. Thai people are very eager to learn English. I am enclosing a photo of our house in Khonkaen, Thailand.

George and Thanida

Our house in Khonkaen, Thailand.
